User Manual - Feet Dryer Valiryo FD Airsword 270°

Discover its features and benefits

Our foot dryer uses our advanced Air Sword technology, which provides a powerful, enveloping airflow to ensure fast and thorough drying of each foot. It is automatically activated when you insert your foot into the drying zone, offering a touch-free, uninterrupted experience.

Valiryo places great importance on foot drying, combining cutting-edge technology, hygienic benefits, and ease of use for people of all ages and abilities. Say goodbye to towel friction and foot moisture.

DRY AND RELAXED

With Valiryo, you can avoid fungus, irritation, and unpleasant odors caused by moisture on your feet. Plus, you'll experience a new sense of well-being, enjoying more relaxed feet.

GREATER HYGIENE

Valiryo features an antibacterial additive in its paint, along with ultraviolet light that helps reduce the growth of microorganisms, including bacteria, viruses, and other pathogens.

ERGONOMIC DRYING

Our foot dryer allows you to dry your feet completely without the need to bend down, and it can be used both sitting or standing, making it ideal for individuals with limited mobility.

GREATER EFFICIENCY

Thanks to its advanced technology, enveloping foot drying design, and powerful motor, it achieves a quicker drying time, resulting in reduced energy consumption.

Unboxing: product presentation

What should the box contain?

The box contains exclusively the feet dryer, properly protected for transport. The dryer is ready to be plugged in (with a 180 cm power cord) to your home electrical system and used in your country. We offer different versions adapted to each market.

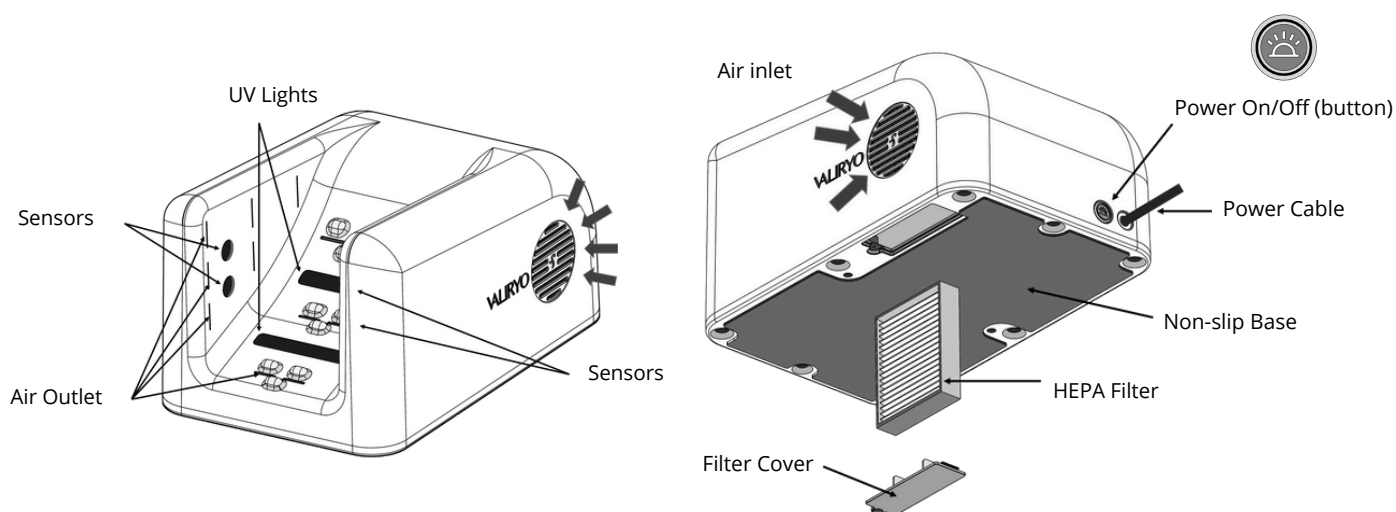

Additionally, the box includes a startup document with a QR code, allowing you to access our website, download this manual in your preferred language, and view other information about the foot dryer.

Please make sure to inspect the product as soon as you receive it to ensure it hasn't been damaged during transport. It is also important to keep the box for a few days in case you need to return the product.

Discover the different components of our feet dryer

Our feet dryer is a single compact unit. Below, we present two diagrams showing its different parts so you can identify the components: power cord adapted to your territory, proximity sensors, UV lights, air diffusers, and air filter.

It is important to leave a minimum free space of at least 50 mm on the air intake side of the device (right side).

Setup and usage instructions

How do I choose the installation location for the feet dryer?

The feet dryer does not require installation. It is a wellness device that only needs to be plugged into an electrical outlet. Our recommendation is to find a fixed location to avoid the inconvenience of moving it constantly, depending on the main use:

- A dry area in the bathroom where there is no risk of heavy splashes.
- Other areas in the home: bedroom, dressing room, entryway, etc...
- Spa area, gym, or poolside.

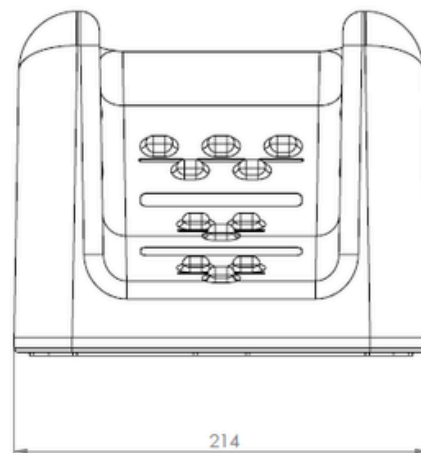

How to start the feet dryer?

Once positioned in the most suitable location, simply plug it into the electrical outlet to turn it on. **The dryer automatically activates through an infrared optical sensor located around the drying area.** It turns on when you place your foot within the air outlet perimeter.

Additionally, the UV lights turn on when the foot is detected in the drying zone for extra hygiene. At the back (see component diagram), there is a button to turn these lights on or off. To prevent unnecessary energy consumption, the dryer automatically shuts off 180 seconds after activation.

Cleaning and maintenance tips

How is it recommended to clean the device?

Valiryo recommends cleaning the surface with a damp microfiber cloth. The use of harsh cleaning products is not recommended.

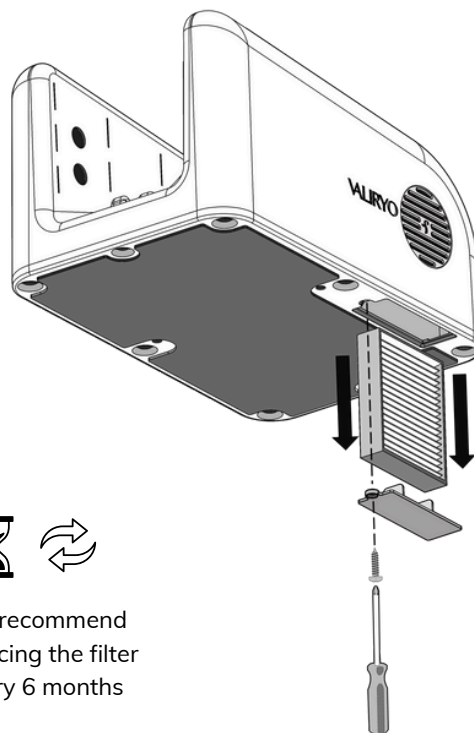

Does the device require any maintenance?

To maintain optimal performance, we recommend replacing the filter every 6 months. You can purchase replacement filters on our website.

How to replace the filter?

The filter replacement process is simple. Just follow these steps:

1. Remove the filter casing by unscrewing it carefully..
2. Take out the old filter and place a new one in its position.

For any inquiries, contact us:

- **2-year warranty**

SAFETY WARNING

Please read this section carefully!

If this device is not used correctly, it could cause serious personal injury or property damage. The manufacturer is not responsible for misuse of the equipment. Unauthorized tampering with the device will void the warranty.

- DO NOT block or obstruct the air inlet and outlet slots.
- DO NOT allow children or adults to climb on the device, as this could damage it.
- For repairs or adjustments:
 - Disconnect the equipment from the power source before performing any repairs.
 - Repairs must be carried out by an authorized service center.
 - If the cable is damaged, it must be replaced by the manufacturer, a service agent, or qualified personnel to avoid risks.
- Do not attempt to modify the equipment without authorization, as it could cause fires, electric shocks, or accidents.
- It is essential to protect the device and comply with local electrical safety regulations. Consult your installer if you have any doubts.
- DO NOT use the device in the presence of gases, explosives, or flammable objects. The surfaces of the equipment may become hot if used intensively.
